PROFESSIONAL CAREER SUMMARY

I am dedicated and enthusiastic beginner-level programmer with a passion for learning and problem solving. Proficient in foundational programming languages such as c++, html, css or javascript with a strong understanding of fundamental programming concepts including variables, loops, functions, and data structures. Possesses excellent analytical skills and attention to detail, demonstrated through successful completion of coding projects and coursework. Eager to apply knowledge and skills to contribute effectively to a dynamic development team while continuing to expand expertise in software development. Excellent team player with strong communication skills, ready to collaborate and adapt in fast-paced environments.

TECHNICAL & SOFT SKILLS

- MS Office
- Adaptability
- HTML / CSS
- CSS Preprocessing
- JavaScript (ES6+)
- Problem Solving
- Responsive Design Principles
- Web Performance Optimization
- Debugging and Developer Tools
- Front-End Frameworks/ Libraries
- Empathy
- Creativity
- Adaptability
- Documentation
- Time Management
- Attention to Detail
- Team Collaboration
- Operating and IT Tools
- Version Control Systems
- Strong Analytical & Problem-Solving Skills

WORK EXPERIENCE

FRONT-END WEB DEVELOPER

- Develop and maintain user-facing features for web applications, ensuring high performance, responsiveness, and usability across various devices and browsers
- Write clean, efficient, and well-documented HTML, CSS, and JavaScript code to implement frontend solutions.
- Optimize web assets and code for maximum speed and scalability, utilizing techniques such as minification, compression, and caching.
- Conduct thorough testing and debugging of front-end code to identify and resolve issues, ensuring cross-browser compatibility and accessibility standards compliance.
- Stay updated with industry trends and best practices in front-end development, integrating new technologies and tools as appropriate to enhance user experience and performance.
- Work closely with stakeholders to gather requirements, provide technical guidance, and collaborate on project planning and execution.
- Troubleshoot and resolve front-end related issues reported by users or internal teams, providing timely and effective solutions.
- Maintain and update existing front-end codebase, implementing enhancements and optimizations as needed to meet evolving business needs and requirements.
- Collaborate with designers and back-end developers to translate UI/UX designs into functional, interactive interfaces.
- Experienced in making UI designer web through languages

EDUCATION

University of Malakand (UOM)

- Bachelor of Science in Computer Science
- Duration: September 2021 – September 2025
- Grade: 3.35 CGPA
- I am currently engaged in my studies at Govt Postgraduate College Timergara, where I am building a robust foundation in computer science principles, programming languages, and problem-solving skills.

Government Postgraduate College Timergara

- Intermediate in Pre-Engineering (XII)
- Duration: September 2019 – july 2021
- Grade: 73%
- I have successfully completed my FSc in Pre-Engineering at Government Postgraduate College Timergara, showcasing my dedication to academic excellence and a strong grounding in engineering principles.

Government High School (TKS)

- Matric in Science
- Duration: Apr 2016 – Apr 2018
- Grade: 85%
- I have successfully finished my Matriculation from our village Government High School Takora Sheikhan, I established a solid academic base that has been instrumental in supporting my subsequent educational endeavors.

INTEREST

- Mentor
- Decision Making
- Empowerment
- Emotional Intelligence

- Networking
- Programming
- Problems Solving
- Artificial Intelligence

LANGUAGES

- English: Fluent
- Urdu: Fluent
- Pashto: Native
